

Stacked Plank

Tuddle Red

Our wood plank selection offers the most realistic faux options on the market. Cast from real antique artifacts, you will be amazed at the level of realistic detail. Our individual plank system allows for ultimate design flexibility and endless possibilities. Made of lightweight urethane composite, planks will

not warp as with traditional materials. Both finished and unfinished boards come with a high density exterior shell so your finished project will stand against wear for years. Unlike actual reclaimed wood products, FauxLogic's wood planks are non-porous, easily cleaned and will not harbor insects. Installation is simple and cutting can easily be done with hand tools.

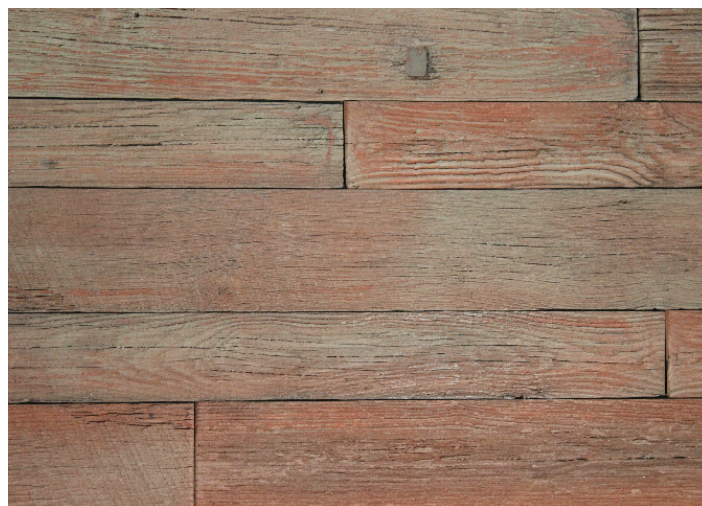

**Strong Urethane Composite
Tongue and Groove Assembly**

4" and 5.5" Planks

Lightweight

Non Harboring

**Install using construction
adhesive and normal carpentry tools**
